Leah (Gaeun) Kim

(416) 896-2757 | leah.kim0118@gmail.com
Full Stack Developer
Portfolio | GitHub | LinkedIn

SKILLS

Front-End: React, Next.js, TypeScript, JavaScript, Redux, RTK Query, HTML/CSS
Back-End: Python, Django (DRF), Celery, REST APIs, PostgreSQL
Testing: Unit & Integration Testing, React Testing Library, MSW, Postman
Technologies/Tools: Git, AWS, Docker

PROFESSIONAL EXPERIENCE

Full-stack Software Developer May 2024 - Present
Leap Tools (Remote), Toronto, ON

- Delivered **110+ development tasks** across business- and customer-facing products, building React/TypeScript interfaces and Python/Django REST APIs used by store staff, vendors, and manufacturers.
- Implemented **lead editing across three services** with DRF object permissions and duplicate-lead checks, and synced related records so automated follow-up emails reached customers' new contact details.
- Built **asynchronous CSV/XLSX lead imports with Celery** so dealers could move leads from other CRMs in one upload, with row-level validation, duplicate detection, and a failed-row file to fix and re-upload.
- Created **a daily task-reminder email job** that sends each assignee their overdue and upcoming CRM tasks, running hourly to deliver it once a day in each vendor's time zone.
- Wrote **frontend and backend tests** for user flows, API behavior, permissions, and validation with React Testing Library, MSW, and Python, and fixed defects such as a CSV export that did not match on-screen filters.
- Collaborated with developers and product stakeholders to prepare **technical implementation plans for 70+ stories**, presenting breakdowns in weekly team meetings, comparing approaches and trade-offs, identifying service dependencies, and defining frontend, backend, and testing requirements.

Full-stack Developer (Co-op) Sep 2022 - Dec 2022
Ministry of Transportation Ontario, Toronto, ON

- Developed Angular interfaces and ASP.NET (C#) backend services, collaborating with developers to implement user stories and resolve application issues.
- Implemented accessible web features in compliance with AODA and WCAG standards.

Full-stack Developer (Co-op) May 2022 - Aug 2022
Alpha Labs, Toronto, ON

- Built full-stack web applications using ASP.NET (C#) and MySQL, implementing responsive interfaces with JavaScript and Bootstrap.
- Developed **60+ automated tests** using Selenium to verify application functionality and support regression testing.

EDUCATION

Software Engineering Technology - Artificial Intelligence Advanced Diploma Jan. 2021 – Dec. 2023
Centennial College, Toronto, ON *GPA: 4.23/4.5*

PROJECTS

Aura (GitHub)

- Built a full-stack e-commerce application using React, Redux, Django REST Framework, and PostgreSQL.
- Integrated **PayPal checkout** alongside user authentication and product search.
- Deployed the application to Heroku and configured AWS for media storage.

Personal Portfolio Website (GitHub | Demo)

- Built a responsive React and SCSS website with interactive animations using Framer Motion.
